Profile

I am a full stack web developer with a flair for creativity and outside-of-the-box problem solving. My experience as a musician has given me the ability to perform well under pressure and improvise when the situation calls for it, skills I put to use building powerful, elegant web apps.

Skills

Front End: HTML5, CSS3, Javascript, Jquery, React.js, SASS, Firebase, Contentful CMS
Back End: Node.js, Express, Python, Heroku, MongoDB
Other Relevant Skills: Git/Github, Bash CLI, React Native, Microsoft Office, Audio Engineering w/ Logic Pro

Web Development Experience

General Assembly - Web Development Immersive
12 week full-time program focused on web development tools and best practices.

Pete's Pedals: https://www.petespedals.net/
I built this site for my dad's guitar pedal business using React and the Contentful CMS. I wanted him to be able to determine the site's content without having to navigate the codebase, and I did not want to be tied into the layouts of a more traditional CMS.

Travels Log: https://my-travels-log.herokuapp.com/
I worked on this project as part of a 3-person team; my primary responsibility was front-end design and logic, although I also spent time writing CRUD routes in Node.js.

Other Work Experience

Fricano's Deli | *Manager/Line Cook* | *September 2013- Current*
Family-owned sandwich shop in West Campus. Responsibilities include cooking, taking orders and serving customers, prep work, cleaning, assigning tasks to other employees, opening/closing the store, preparing and delivering catering orders, and ensuring that the business is successful and customers are satisfied.

Musician | *Self-employed* | *January 2011- Current*
I have been playing and performing music for almost my entire life. Over the last seven years in Austin, I have performed frequently with 6 different bands on Bass Guitar, Electric and Acoustic Guitar, Vocals, Banjo, and Keyboards. I have worked on a variety of recording projects as well, working at Fifth Street Studios, Estuary Recording, Ohm Recording Facility, Fire Station Studios in San Marcos, and Nightsound Studios in Chapel Hill, NC.

Education

12-week Web Development Immersive Course at General Assembly in Austin, TX, Fall 2017
15 credit hours of Computer Science coursework at Austin Community College, Spring-Fall 2015
60 credit hours of Physics coursework at UT Austin, Winter 2011-Spring 2013
